A colorful illustration of a pig wearing a green and white checkered shirt and blue overalls, pulling a large yellow hay bale on a red wooden cart with two wheels. The pig is walking on a path through a forest with several tree stumps and a few trees. A squirrel is sitting on a tree stump, and several small birds are perched on branches and flying around. The scene is set in a bright, sunny environment with falling leaves.

Piggy number 1, was a lazy fellow.
He wanted to build his house as
quickly as he could.
So that is what
he did.

Now Piggy no.2, wanted to build his house out of wood. But being slightly lazy, though not as lazy as pig no.1, he didn't want to cut down any trees, so he used sticks, twigs and some old wood he bought off the back of a lorry. He was just finished when...

The Sky is
Falling in!

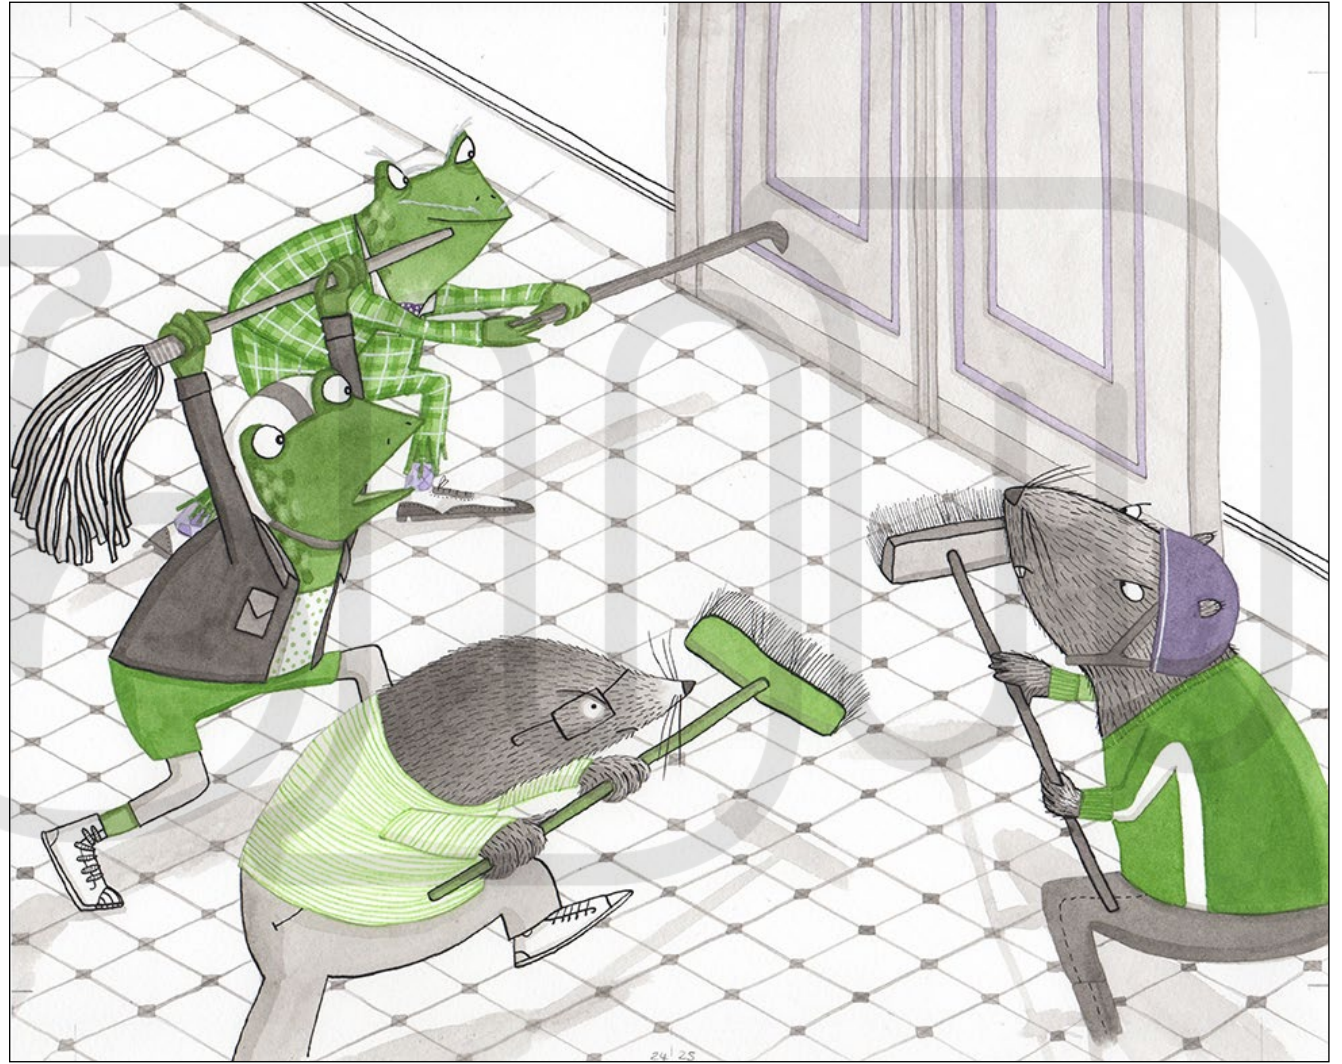

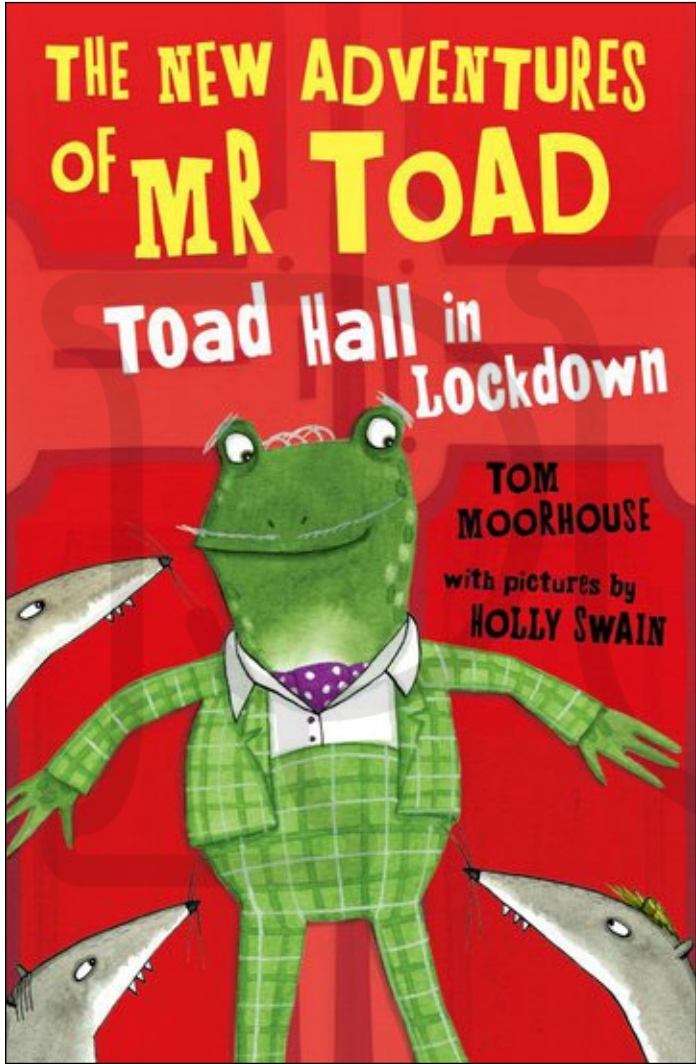

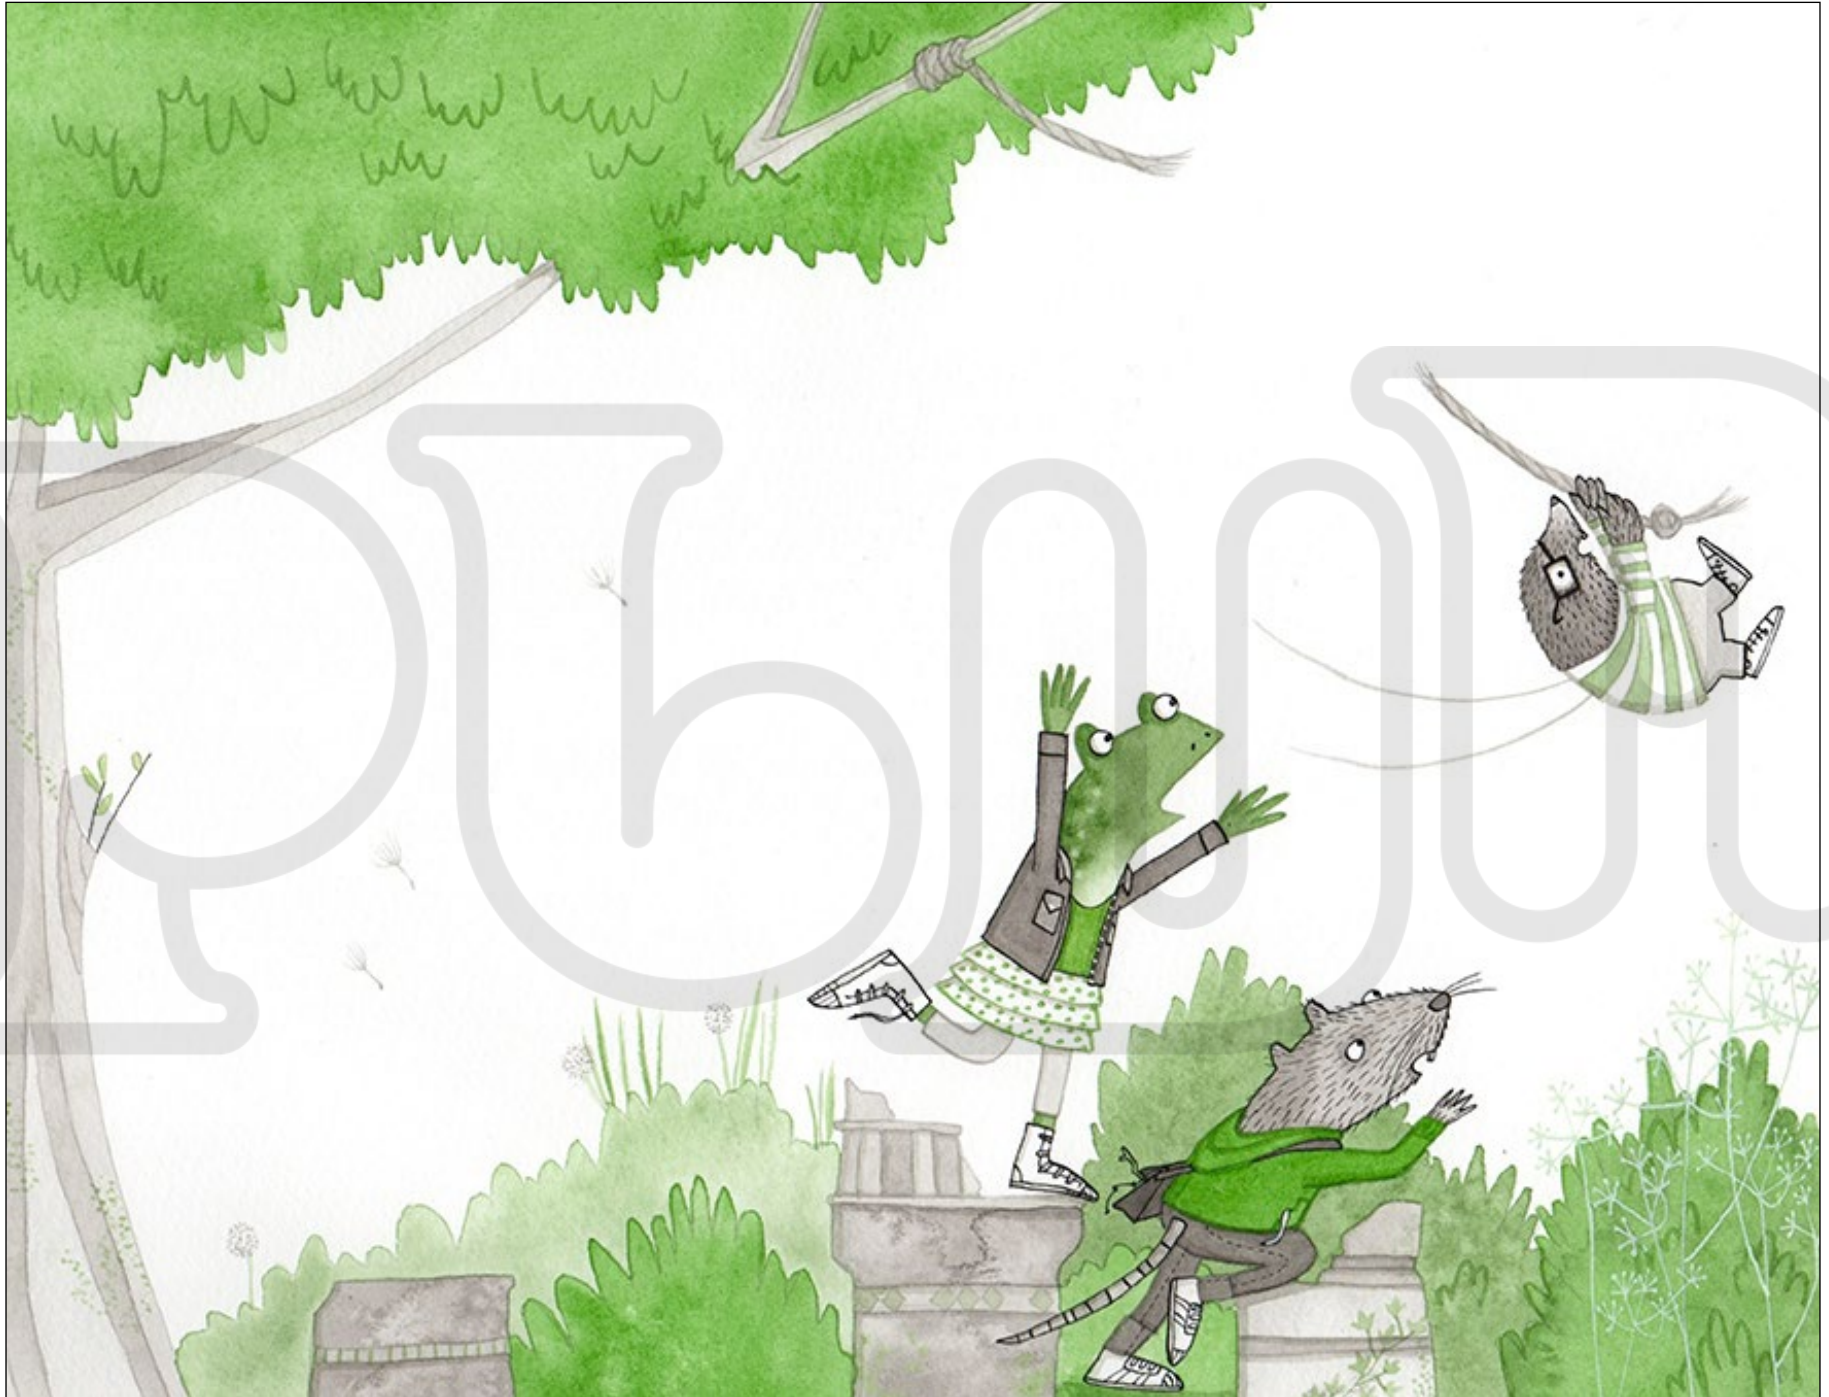

Well Done! You've found a
whole COVEN!!
Now it's time to...

RUN!!

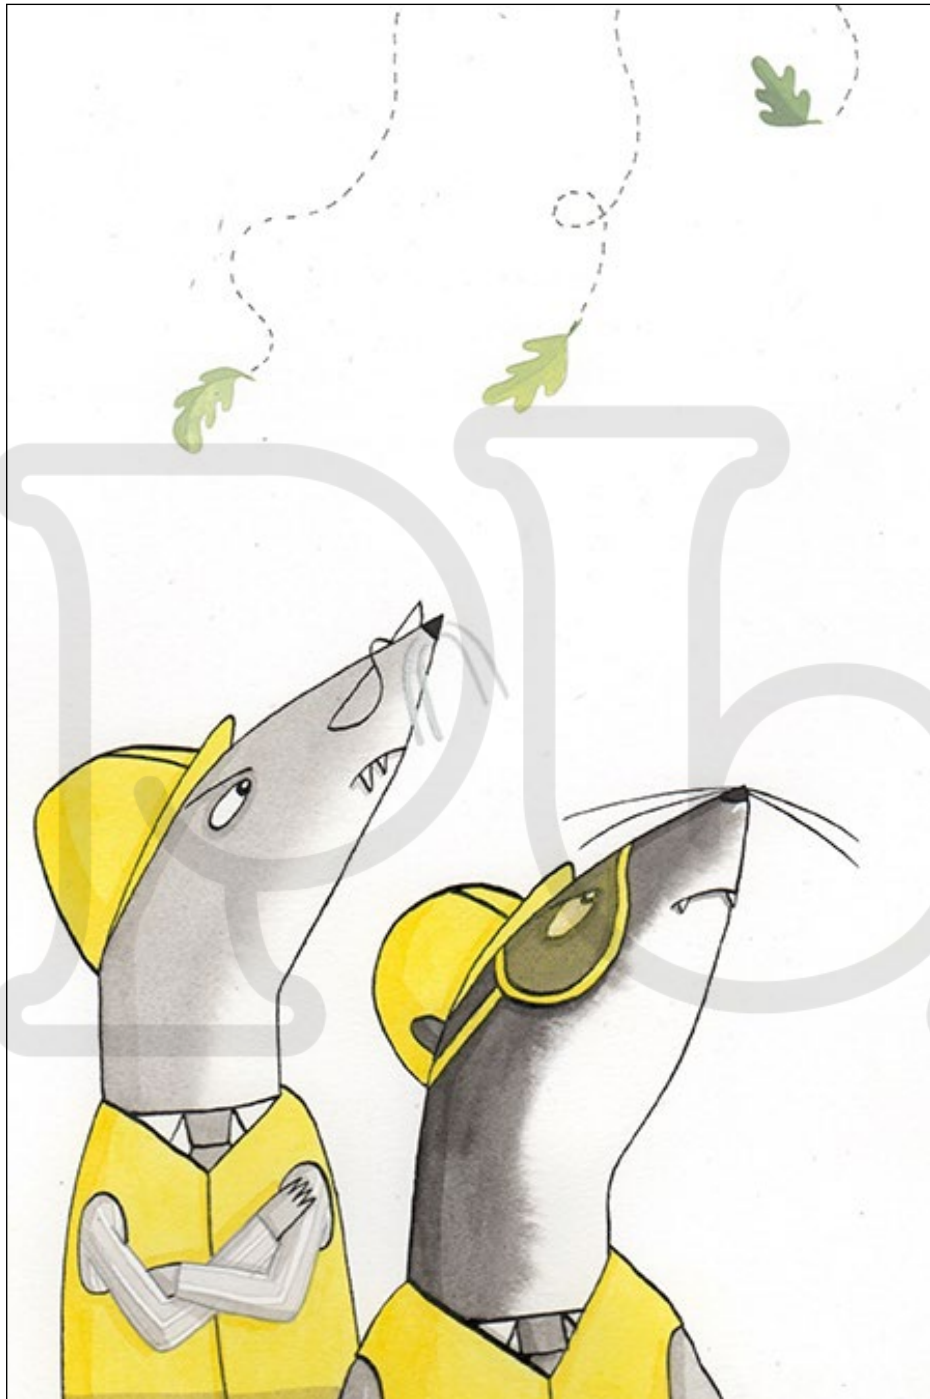

Brushes and paints are all I have to speak

the music in my soul

Lilium Lancifolium

Tiger lily

I have stripes NOT spots!

Also known as the Devil Lily.

The bulbs of Tiger lilies are edible and they are often roasted like potatoes. (They taste a bit like turnips.)

All parts of the Tiger lily are toxic to cats- if eaten they could DIE!

80-200cm tall.

There's a superstition that if you smell the tiger lily, you will get FRECKLES!

It is said that if you grow Tiger lilies by the house, it will ward off bad spells, ghosts and evil spirits.

Monarch butterflies are attracted to Tiger lilies.

Also known as the Turks cap.

PESTS

include aphids, slugs and the Lily Beetle.

Archery Facts

Archery is the national sport of **Bhutan**.

In the Middle Ages, a Longbowman could release **10-12** arrows, a minute.

In the 1900 summer Olympics, **LIVE** pigeons were used as targets in Archery.

Archers shoot with a dominant eye.

Pole vault Facts

The average family car is

A Pole Vaulter uses a pole **3.5** metres to **5** metres **30** long.

The Poles used to be made of wood, but they are now made of fiberglass and carbon fibre, so they bend.

Travelling athletes have to check that their poles will fit on an aircraft. In the 1960's an airline couldn't fit a pole in and so they cut it up into bits so it would fit!

The run up for a pole vault is **40** metres long.
